

Heads of Terms — Anchor Tenancy

SUBJECT TO CONTRACT — NON-BINDING

Party A	Aldgate Digital Infrastructure plc
Party B	[Cloud Provider] (name redacted under NDA)
Status	Subject to contract; non-binding
Date	28 April 2026

1. Status of this document

1.1 These Heads of Terms record the parties' current intentions in relation to a prospective anchor tenancy and are expressly SUBJECT TO CONTRACT and NON-BINDING. They create no legally binding obligation on either party other than the confidentiality and exclusivity provisions at clause 5.

2. Indicative commitment

2.1 The parties envisage an anchor tenancy of up to 70% of available IT capacity, subject to the negotiation and execution of a definitive lease and service agreement, and to the tenant's internal investment approval.

2.2 Indicative term: 15 years with two 5-year extensions. Pricing, service levels, and power-availability guarantees remain to be agreed.

3. Conditions to a binding agreement

3.1 Any binding commitment is conditional on (a) board approval by both parties; (b) confirmation of a firm grid connection date; and (c) completion of technical due diligence on the campus design.

4. No reliance

4.1 Either party may withdraw at any time before execution of the definitive agreements without liability. Neither party shall represent to any third party that a binding tenancy exists.
