

Grid Interconnection Application Form

Transmission connection — demand

PROJECT ID: TX-DEM-002

PROJECT NAME: Aldgate Hyperscale Data Centre

APPLICANT: Aldgate Digital Infrastructure plc

LEVEL: transmission

CONNECTION TYPE: demand

CAPACITY: 300 MW import

STATUS: Under review

DATE SUBMITTED: 2026-05-02

SECTION 1: Project & site

REQUIREMENT:

Site address plus coordinates and site classification (data centre, industrial, etc.). Source: CUSC application schedule.

SUBMITTED:

Proposed hyperscale data-centre campus at Aldgate Park, Thurrock, RM18 8RH (51.478 N, 0.345 E). Classification: data centre, AI / cloud compute, served by the 400 kV Tilbury substation.

SUPPORTING DOCS:

none

SECTION 2: Land — control

REQUIREMENT:

Exclusive land access (proposed Gate-2-style readiness criterion). Source: Demand Connections CFI Feb 2026 §5.2.

SUBMITTED:

Aldgate holds a 35-year registered leasehold over the entire 12-hectare campus, granting exclusive possession from completion.

SUPPORTING DOCS:

land_lease_agreement.pdf

SECTION 3: Planning

REQUIREMENT:

Outline or full planning consent, or evidence of submission — strengthened readiness criterion for data centres. Source: CFI Feb 2026 §5.27.

SUBMITTED:

Full planning permission for the data-centre campus has been secured from Thurrock Council, demonstrating the site is build-ready.

SUPPORTING DOCS:

planning_status_letter.pdf

SECTION 4: Commercial

REQUIREMENT:

Commercial off-taker — for data centres, evidence of a customer / hyperscaler tenancy contract. Source: CFI Feb 2026 §5.2.

SUBMITTED:

A hyperscale cloud provider has committed to anchor tenancy for 70% of the IT load under a signed contract, evidencing firm economic backing for the connection.

SUPPORTING DOCS:

anchor_tenant_heads_of_terms.pdf

SECTION 5: Project capacity

REQUIREMENT:

Maximum demand (MW), minimum demand, import profile; for data centres the IT load curve and PUE. Source: Grid Code Demand Code (DC).

SUBMITTED:

Maximum demand 300 MW; minimum (overnight) 180 MW. Near-flat 24-hour import profile typical of AI training workloads. Design PUE 1.18 with evaporative-assisted cooling.

SUPPORTING DOCS:

none

SECTION 6: Non-firm option

REQUIREMENT:

Willingness to accept a non-firm or interruptible connection. Source: CFI Feb 2026 §5.2 (Connect).

SUBMITTED:

Aldgate will accept a non-firm connection for up to 60 MW of the total load, interruptible at 30 minutes' notice, in exchange for an earlier connection date.

SUPPORTING DOCS:

none

SECTION 7: Securities

REQUIREMENT:

User commitment fee / financial security under CUSC Section 15. Source: CUSC §15 User Commitment Methodology.

SUBMITTED:

Aldgate accepts the CUSC Section 15 user-commitment liability and will post a £24m on-demand bank guarantee at the offer-acceptance milestone.

SUPPORTING DOCS:
